- ▶ Cost Effective
- ▶ Timely Delivery
- ▶ Dedicated Workforce
- ▶ Customization Facilities
- ▶ Strong Market Networks
- ▶ Rich Industry Experience
- ▶ Use of Advanced Technology

Slotted Angle Shelving

This is the most economic and widely used shelving system that affords a good deal of flexibility. It provides simple, cost-efficient solutions for virtually any storage requirement. Scientifically designed pattern of holes and slots are perfectly positioned for bolting pieces together at various angles.

Long Span/Medium Duty Shelving

Long-Span shelving is very easy to assemble and provide a quick and economical way to transform your storage area. This system will easily meet your individual requirements for optimised warehouse technology. It is ideal for bulky loads and suitable for order picking and bulk storage. A comprehensive range of frames and beams accommodates wide range of loading capacity.

Heavy Duty Shelving

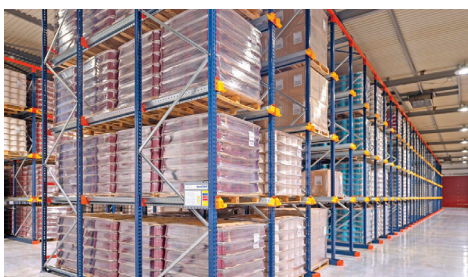

This system has large loading capacity than long span shelving. Heights and levels are adjustable according to the customer needs. Easy for installation and can use maximum area of the warehouse.

Pallet Racking

Pallet racking is an ideal starting point for all your warehousing and storage needs. It can be easily utilised using standard forklifts and battery/manual stackers. Single or double sided runs of pallet racking are separated by aisles that can be sized to suit the customers forklifts. It offers a full range of compatible accessories for various pallet types, sizes and weights for the system.

Drive-In Pallet Racking

Drive-In pallet racking has the ability to store a large amount of similar loads in a smaller area. It is designed to efficiently suit the storage of homogeneous products in large quantity. Drive-In racks allow a lift truck to enter the rack from one side to pick up or pull out pallets. Forklifts drive into the rack to access pallets two or more deep. It works on the FILO (First In Last Out) rule.

Cantilever Racking System

Cantilever storage racks are useful for storing long objects. It provides instant accessibility to one piece or a Full load. Forklift access is easy. Cantilever arms are easily adjusted to accommodate any bundle size. It is a perfect low cost solution to store long and irregular items.

Mobile Shelving

Mobile Shelving is an innovative space saving storage system with storage units mounted on mobile trolleys. The units which are fitted with wheeled traction systems that are completely collapsible when access is not required, and can be easily moved using crank wheels to open up the aisles when access is required. It is safer than ever and very smart way to save space, increase storage capacity and improve office productivity and security.

Mezzanine Floors

Designed to suit your specific requirement our mezzanine floor will transform you existing premises. It creates storage space from available vertical space. Designed, approved and fitted in less time than you think, you'll hardly find a ripple in your work flow whilst a new working environment is created.

Multi-Tier Shelving

Pallet racking is an ideal starting point for all your warehousing and storage needs. It can be easily utilised using standard forklifts and battery/manual stackers. Single or double sided runs of pallet racking are separated by aisles that can be sized to suit the customers forklifts. It offers a full range of compatible accessories for various pallet types, sizes and weights for the system.

Bolt Free Shelving

This is a flexible, modular hand loaded shelving system. The bolt free lock together can be quickly and easily installed. The levels can adjust easily. These systems are available in an extensive range of sizes. This type of shelving has a nice looking , fast and easy to assemble and disassemble without special tools.

Super Market Shelving

Super market shelving to help store owners make the most of the space they have available and organise their store to make it as productive as possible. Choose from gondola shelving, wall shelving and several other configurations of shop shelving to create the right display layout for your requirements.
